

**Izzo Vivi PID Plus**, with its beautifully-moulded 304 stainless steel heat-protective body panels, shares many of the premium features of the larger **Alex**: a more compact boiler delivers powerful steam & hot water; a P.I.D. (with integrated shot timer) adjusts the brew temperature; and powerful simultaneous steam is delivered through the cool-touch steam wand. Its compact design means it fits anywhere while its industrial-grade construction helps **Vivi** maintain a strong footing like a larger professional machine.

Our **Zuccarini** group temperature modification performed at the factory in Italy prevents the cooling flushes required on other traditional E61 machines, delivering stable, consistent temperature in the brew group (adjustable via the integrated P.I.D.). This allows for creamy espresso brewed at a temperature you can modify, without continually flushing the group.

**Available in 3 finishes** (mirror-finish steel, matte white or black) and a selection of standard or optional accents (black, white, red, or wood knobs & portafilters).

Canada's original importer of fine Italian espresso equipment for home, office & commercial use — since 1954

## Key Features:

- One of the **most compact E61 espresso machines on the market** (width & height) despite its versatility, power & sturdiness
- 2 x 58mm ergonomic commercial brass portafilters, professional metal hand tamper, and E61 group with PID and **Zuccarini custom mod for rich, hot espresso**
- **Lever valve system** instantly releases pressure from group for dry coffee pucks and fast re-use
- Full-motion, multi-jet, **"cool-touch" stainless steel steam wand for fast micro-foamed milk** at the same time as you are brewing your espresso
- Space-saving yet powerful **1.5-litre 1350 watt copper & brass boiler** allows for abundant steam pressure and instant boiling water
- Strong **sound-dampened vibration pump with over-pressure valve system** delivers perfectly consistent water pressure to the brew group
- **Dual pressure gauges** measure steam and pump pressure for monitoring your machine and usage
- Self-priming boiler with **3-litre water reservoir with safety shut-off**
- Includes blind filter for backflushing, group cleaning brush, barista towel, custom machine cover, and adjustable feet to slightly raise or level machine

**Specs:**      **height:** 38cm/15"  
                  **width:** 31cm/12"  
                  **depth:** 43cm/17"
