

PUREBREW+

PUREBREW+

Experience the future of flavor with PureBrew+ with Victoria Arduino's latest innovation. This cutting edge brewing technology is designed to elevate your taste experience, unlocking the full potential of coffee beans, tea leaves, and unexplored ingredients.

For the Innovators of Taste

PureBrew+ is designed for those who push boundaries and seek excellence. Whether you're a roaster, an origin producer, a coffee shop owner, a chain, an office, a hotel, a mixologist, or a syrup brand, PureBrew+ promises a unique quality filter coffee and tea experience.

Unleash Extraordinary Flavors

Discover unparalleled flavors with our precise and innovative brewing techniques. PureBrew+ blends premium quality with groundbreaking technology, delivering a taste experience that's nothing short of extraordinary.

PureBrew+ stands as a sleek and compact device meticulously engineered to harness our patented PureBrew technology. It occupies minimal space on your countertop or bar, workstations or rooms dedicated to the mixologist, while providing swift and effortless access to premium coffees, teas, botanicals and infusions. Featuring an expansive touchscreen display, effortlessly select from a range of 12 predefined recipes.

This precision control empowers you to oversee every detail: from precise input and output quantities, temperature, and pulse, to the profile of each unique beverage. Meanwhile, our compact single boiler sources water directly from supply, with a new heating system featuring a double circuit that enables you to instantly change the temperature to brew different beverages to exact specifications. Leading to a maximum yield of 500ml for your desired drink at unprecedented levels of speed.

Our PureBrew+ Product Promise

Intuitive

PureBrew+ is designed to be effortlessly simple. No need for extensive instructions—just intuitive operation.

Consistent

Every cup, every time. PureBrew+ delivers the same high-quality experience, consistently.

Fast

Efficiency at its best. PureBrew+ saves you time with its quick and seamless brewing process.

Repeatable

Reliability you can count on. Enjoy the same great results with each use.

Customizable Recipes

Tailor your brew to perfection. PureBrew+ offers flexibility to match your unique preferences.

Stand-Alone and Compact

Simplicity in installation and maintenance. PureBrew+ is designed to fit seamlessly into your space.

Sustainable

Reduce waste, maximize flavor. PureBrew+ eliminates the need for tea bags and ensures precise final coffee dose settings, up to 500ml. No filter coffee wasted, always fresh.

PureBrew is a unique technology from Victoria Arduino. Paired with our new patented double mesh filter cone, it brings you filter coffee and tea with unparalleled precision in every cup.

PURETASTE UNLIMITED FLAVOUR

Control every parameter. Adjust the dose, volume, and temperature by selecting from various water impulse profiles: light, medium, and dark. This ensures a high-quality coffee or tea extraction in less than three minutes, with consistently exceptional results every time.

Effortless Brewing

The brilliance of PureBrew technology lies in its remarkable simplicity. Just set the water impulse profiles—light, medium, or dark—and let the PureBrew algorithm do the rest during the three phases of brewing.

Three Extraction Phases

PureBrew technology guides your coffee through three precise extraction phases. The first phase, consistent across all recipes, blooms your coffee with a brief pause. The subsequent phases adapt based on the selected profile, ensuring optimal extraction every time.

Three PureBrew Extraction Profiles

With the light profile, frequent, short impulses create higher turbulence. The dark profile features longer impulses with extended contact time, resulting in less turbulence. The medium profile strikes a balance between the two, offering a middle ground. For those who want to experiment even more, PureBrew+ offers the possibility to create custom recipes, allowing you to tailor each brew to your precise preferences.

PUREBREW+ FEATURES

PureBrew+ epitomises the pinnacle of PureBrew technology's evolution, meticulously crafted to embody compactness, speed, and efficiency.

1

User-friendly digital interface

Enhanced with a spacious, clear touch screen interface, PureBrew+ empowers you to establish precise brewing recipes with ease. The user-friendly design offers convenient one-touch access for swift and efficient production. Furthermore, this advanced brewing system allows you to enter and save up to 12 recipes, ensuring you have a wide range of options at your fingertips. Its intuitive user interface makes it incredibly easy to use and navigate, providing a seamless brewing experience for both beginners and experts alike.

2

Patented conical filter basket

Our patented PureBrew conical filter baskets come in two different sizes, accommodating up to 20g and 30g of coffee for even greater versatility. This allows for a wide array of beverage sizes to be prepared with ease and precision. Additionally, using different filters ensures no contamination between coffee and tea, maintaining the purity and flavor of each beverage.

3

Versatile tray configuration

Featuring two tray height settings, PureBrew+ accommodates larger cups and jugs, providing the versatility you demand.

4

Energy-efficient heating system

PureBrew+ introduces two groundbreaking innovations that elevate both quality and productivity. Featuring a new instant and energy-efficient heating system, along with a patented double hot-cold circuit, PureBrew+ allows for rapid adjustment of extraction temperatures between 75 and 95°C. The brewing group, optimized to work seamlessly with our new patented double-circuit system, ensures maximum precision and consistency in every brew.

Thanks to these advanced technologies, PureBrew+ offers unparalleled versatility. It can effortlessly produce coffee or tea from different origins, each requiring unique extraction times and temperatures, without any risk of contamination. Enjoy a flawless, automatic, consistent, fast, and waste-free brewing experience—all at the touch of a button.

3 DIFFERENT TYPES OF RECIPES: COFFEE, TEA AND COCKTAIL'S

ELEVATE THE COFFEE EXPERIENCE

For coffee shops, cafés, and restaurants, PureBrew+ offers a valuable capacity boost, enabling the creation of high-quality coffees with speed and seamlessness. You can brew the exact quantity you need without any waste, and effortlessly brew various types of coffee at different temperatures, adjusting the temperature instantly. Whether utilized as a standalone unit or integrated with your current equipment, PureBrew+ enhances the coffee-making process's speed while upholding exceptional quality. This empowers you to meet the high demand of your business efficiently, ensuring you serve your customers a premium quality cup of coffee every time.

MASTERING THE ART OF TEA

PureBrew+ redefines precision, and efficiency in both coffee and tea brewing. Create perfectly tailored recipes for every tea variety. Achieve the ideal 75°C for delicate white and green teas, 85°C for robust black and Oolong teas, or a full-bodied 95°C for herbal infusions. With PureBrew+, you can seamlessly switch between personalized recipes at the touch of a button, ensuring each cup is brewed to perfection. Say goodbye to tea bags and enjoy brewing various types of tea at different temperatures, with instant temperature adjustments. PureBrew+ transforms tea brewing into an artful experience.

MIXOLOGY REIMAGINED

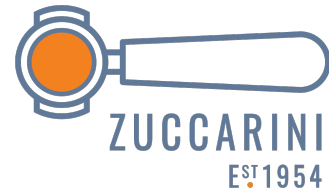

In the fast-paced world of a busy bar, PureBrew+ delivers premium tea, coffee, botanicals, and infusions for precise flavors in every cocktail or mocktail. This innovation ensures unmatched quality and streamlines the process, allowing you to serve outstanding beverages effortlessly and enhance the experience for your discerning clientele.

SYRUPS + INNOVATION + FLAVOUR

Dedicated syrup brands optimize raw materials for unmatched quality and flavor. PureBrew+ is their ultimate ally, delivering innovation and impeccable results that complement syrups perfectly. For those looking to elevate their offerings, a customizable white-label PureBrew+ version is available, allowing brands to showcase their identity while leveraging PureBrew+ technology.

A PERFECT MATCH WITH ANY MACHINE

PureBrew+ seamlessly adapts to diverse workflow setups across various venues, effortlessly expanding the menu with consistently high-quality beverages while ensuring simple and swift preparation. Whether employed on its own or integrated into your existing setup, PureBrew+ remains versatile and dependable, consistently delivering outstanding beverages.

PUREBREW+ BLACK EAGLE MAVERICK

For Black Eagle Maverick owners who are already familiar with and appreciate the benefits of PureBrew technology, PureBrew+ offers the advantage of expanded capacity.

PUREBREW+ EAGLE ONE

Eagle One users exhibit remarkable loyalty, and for good reason. However, their eagerness to access PureBrew technology is entirely understandable. With PureBrew+, this desire can be fulfilled.

PUREBREW+ EAGLE TEMPO

Eagle Tempo seamlessly complements the aesthetic of any café, bakery, or restaurant. To perfect this picture, the addition of PureBrew+ alongside a Mythos grinder is the finishing touch.

TECHNICAL DATA
